

June Newsletter - Dolton

Director's Desk

Elise Cole-Rogers, Site Director

June is the month when summer begins, and that means warmer weather and more outdoor fun! We want you and your children to be safe this summer, so here are several tips as we enter National Safety Month. Remember the following:

- **Fire Safety:** Review your fire escape plan with your family.
- **Electrical Safety:** Cover outlets throughout your home.
- **Household Safety:** Child-proof latches on drawers/cabinets and keep cleaning supplies and medication out of children's reach.
- **Play Safety:** Keep watch of your children while they are playing outdoors, and make sure they have shoes on their feet while outside
- **Swim Safety:** Make sure you watch your children while they play in water — swimming pools, lakes, etc. Learn CPR/First Aide so that you know what to do if they are in distress and need immediate help.

These are just a few safety tips — there are more details on how you and your family can keep safe this summer elsewhere in this newsletter. but they should help keep you and yours a little safer whether at home or at play.

Also, please remember to complete and return your weekly at-home activities to your children's teacher, and sign-up for your Parent-Teacher Conference End of Year Home Visit with your child's teacher.
